Origin: 99/99/99	

Machine to be Locked Out	999		Isolation Points to be Locked and Tagged
	Notes:		
	This is the notes field. I am going to add more so that we can see what it would look like when it has to be filled up a little more and maybe how it handles if there are too many words.		

## SHUTDOWN SEQUENCE

1. Notify affected personanel. 2. Properly shut down machine. 3. Isolate all energy sources. 4. Apply LOTO Devices. 5. Verify total de-energizing of all sources.

Energy Source	Device	Isolation Point	Isolation Point	Verification Method	Verification Device
Chemical Boron 1500 PSI	Lower component to full down position Tag: #1234 Description Description Description		Isolation Method	Verification Method
